# Experience and Projects

## Accenture – UX Consultant
**Multiple Digital Products (under NDA)**
2016 - Present

- Planned and conducted user research activities to suggest product design decisions.
- Designed user journeys and both high and low-fi prototypes
- Conducted usability testing with over 100 users to improve the designs for users and the business.
- Led a UX mentorship programme of 15+ junior colleagues, and delivered UX training for 200+ new employees.
- Planned and ran events for the wider company to evangelise human centred design.

## EyeScan – Developer and Designer
**Ophthalmology Diagnostic Tool**
2020

- Created high fidelity prototypes with Figma using best practices and research of tablet interaction.
- Developed designs in React, styled to pixel level detail, refactoring other team members' code for reusability and added animation.
- Created a priority queue API using Aiohttp.
- Developed a WebSocket connection using socket.io in Python and JavaScript.

## MonsteraWear – Developer and Designer
**E-commerce T-shirt Website**
2020

- Designed shopping experience using Figma.
- Developed shopping frontend that makes calls to custom API.
- Created a Django server to handle inventory requests, create orders, and take payments via Braintree.

## Recyclo – Lead Developer
**Recycling Reward Webapp**
2020

- Led a team of 3 developers.
- Designed architecture to allow communication of a Raspberry Pi, React client, and Flask server.
- Combined local API and Google Maps API to give navigational data.
